

Geopathic energy report

Date: 10th July 2018

Onsite / Remote

Client ID: MS062018

Geopathic energy is made up of different sub-categories, each sub-category below has been reviewed.

Water lines

Underground flows of water release a charge of energy when they change their depth of flow. Water lines can be microscopic layers of water and do not necessary follow straight lines. In general, the faster the flow and greater the volume the greater the geopathic effect.

- A Water line enters the property in the dining room (4) and has a negative effect on the environment. It draws energy along its length exiting the property in the Conservatory/healing space (13).

Curry and Hartmann lines

Curry lines are a global grid network of electrically charged lines of natural origin (NE to SW and SE to NW). Hartmann line grid (N to S and East to West). Points of intersection can contribute to geopathic stress.

- A point of intersection exists between the bedroom (11) and the Hall (15). This intersection is also influenced by the Water line and the nearby Black line. This has a strong influence particularly towards the Dining room (4).

Black lines

These are a subtle energy, generally localised that can be straight, curved, at and/or above ground level and can hold 'emotional' qualities.

- Three Black lines cross the property. The most influential is the line going through rooms 13, 12, 15, 4, 1 (left-hand side on map). The emotional quality of this line is not helpful and will be a constant background drain associated with depressive qualities.

Spots and spirals

Spots usually randomly located and spirals in pairs although the pair can be some distance apart. These generally have a detrimental effect on the localised energy.

- Not detected

Clouds or Fog

Inside building usually about 3 metres wide, when energy is trapped in some way usually by a man-made structure not allowing subtle energy to flow. Not particularly detrimental form of energy, often on stairwells but associated with people tripping.

- Not detected

Energy drain and switch

These are not necessarily at ground level and part of the normal structure of things. They are part of the energy system of the planet. Problems occur when they become blocked or the associated switch (usually within 6 metres) is turned off by placing metal over it e.g. washing machine.

- Not detected

Emotionally charged stone

Stone can be energetically charged by being struck. Consideration of the energy of the builder and subsequent transference of energy. Typically, old stone or dressed stone cottages.

- Not detected

Actions

Summary

The main concern is the area between the Bedroom, Hall and Dining room, where a number of negative influences intersect and constantly take energy away from the property. A second area is in the Conservatory/ Healing space where a Black line, Water line and Earth grid line cross.

- Two Black Tourmaline crystals for each Black line will calm the influence and help the natural energy flow of the property.
 - Place in the bottom right corner of the Conservatory/Healing room and the top right corner of the Sitting room about halfway along the wall.
 - Place the second pair, one below the window in the Master bedroom and the other in the top right corner of the other master bedroom.
- One Black Tourmaline crystal in the dining room. I suggest near the end of the wall between this room and the Hall (2). This is not exact and you may need to adjust this positioning.
 - This will greatly influence the whole property and stop energy being pulled out.
- Use the Organic air spray morning and evening:
 - First 3 days use in all spaces
 - Following 15 days use in Sitting room, Dining room, Bedroom/ my healing room, conservatory/ healing space and the two Master bedrooms.
 - After above, use as required but at least once a week.

Optional actions

- A Rose Quartz crystal on the Hall/Bedroom wall will influence the energy in these areas and bring in gentleness, release of stress and emotional balancing.
- North of the property, across the road and in the wooded area, an energy disturbance was detected and may have an influence on the property. A 1 metre copper rod (or copper water pipe also works) inserted into the ground between the property and this area will mitigate any influence on the property.

The essence spray and crystals will have an immediate effect, and I would be keen to hear any feedback after the initial 10-day period.
